

WELLNESS

As required by law, the Board of Education establishes the following wellness policy for the Glen Lake Community School District.

The Board recognizes that good nutrition and regular physical activity affect the health and well-being of the District's students. Furthermore, research concludes that there is a positive correlation between a student's health and well-being and his/her ability to learn. Moreover, schools can play an important role in the developmental process by which students establish their health and nutrition habits by providing nutritious meals and snacks through the schools' meal programs, by supporting the development of good eating habits, and by promoting increased physical activity both in and out of school.

The Board, however, believes this effort to support the students' development of healthy behaviors and habits with regard to eating and exercise cannot be accomplished by the schools alone. It will be necessary for not only the staff, but also parents and the public at large to be involved in a community-wide effort to promote, support, and model such healthy behaviors and habits.

The Board sets the following goals in an effort to enable students to establish good health and nutrition habits:

A. With regard to nutrition education, the District shall:

Nutrition education shall be included in the sequential, comprehensive Health curriculum in accordance with the curriculum standards and benchmarks established by the State.

Nutrition education shall be integrated into other subject areas of the curriculum, when appropriate, to complement, but not replace, the standards and benchmarks for health education.

Nutrition education standards and benchmarks shall be age-appropriate and culturally relevant.

Nutrition education shall include enjoyable, developmentally appropriate and culturally relevant participatory activities, such as contests, promotions, taste testing, and others.

Nutrition education shall extend beyond the classroom by engaging and involving the school's food service staff.

Nutrition education posters, such as the My Plate Program, will be displayed in the cafeteria.

Nutrition education shall reinforce lifelong balance by emphasizing the link between caloric intake (eating) and exercise in ways that are age-appropriate.

Nutrition education benchmarks and standards include a focus on media literacy as it relates to food marketing strategies.

Nutrition education standards and benchmarks promote the benefits of a balanced diet that includes fruits, vegetables, whole grain products, and low-fat and fat-free dairy products.

Staff responsible for providing instruction in nutrition education shall regularly participate in professional development activities designed to better enable them to teach the benchmarks and standards.

Instruction related to the standards and benchmarks for nutrition education shall be provided by highly qualified teachers.

B. With regard to physical activity, the District shall:

[It is recommended that one (1) or more of the following be selected from both categories:]

1. Physical Education

A sequential, comprehensive physical education program shall be provided for students in K-12 in accordance with the standards and benchmarks established by the State.

All students, including those with disabilities, special health care needs and in alternative educational settings (to the extent consistent with the students' IEPs), shall receive instruction in physical education.

The physical education curriculum shall provide sequential instruction related to the knowledge, attitudes, and skills necessary to participate in lifelong, health-enhancing physical activity.

Physical education classes shall provide students with opportunities to learn, practice, and be assessed on developmentally appropriate knowledge, attitudes and skills necessary to engage in lifelong, health-enhancing physical activity.

The sequential, comprehensive physical education curriculum shall stress the importance of remaining physically active for life.

The sequential, comprehensive physical education curriculum shall provide students with opportunities to learn, practice, and be assessed on developmentally appropriate knowledge, attitudes, and skills necessary to engage in lifelong, health-enhancing physical activity.

Planned instruction in physical education shall be sufficient for students to achieve a proficient level with regard to the standards and benchmarks established by the State.

The K-12 program shall include instruction in physical education as well as opportunities to participate in competitive and non-competitive team sports to encourage lifelong physical activity.

Planned instruction in physical education shall require students to be engaged in moderate to vigorous physical activity for at least fifty percent (50%) of scheduled class time.

Properly certificated, highly qualified teachers shall provide all instruction in physical education.

All physical education classes shall have a student/teacher ratio comparable to the student/teacher ratio in other curricular areas.

Planned instruction in physical education shall teach cooperation, fair play, and responsible participation.

Planned instruction in physical education shall meet the needs of all students, including those who are not athletically gifted.

Planned instruction in physical education shall be presented in an environment free of embarrassment, humiliation, shaming, taunting, or harassment of any kind.

Planned instruction in physical education shall include cooperative as well as competitive games.

Planned instruction in physical education shall take into account gender and cultural differences.

Planned instruction in physical education shall promote participation in physical activity outside the regular school day.

2. Physical Activity

Physical activity shall not be employed as a form of discipline or punishment.

Physical activity and movement shall be integrated, when possible, across the curricula and throughout the school day.

Schools shall encourage families to provide physical activity outside the regular school day, such as outdoor play at home, participation in sports sponsored by community agencies or organizations, and in lifelong physical activities like bowling, swimming, or tennis.

All students in grades K- 6 shall be provided with a daily recess period at least 20 minutes in duration. Recess shall not be used as a reward or punishment.

All students in grades 7-12 shall have the opportunity to participate in extracurricular activities and intramural programs that emphasize physical activity.

All students in grades 7-12 shall have the opportunity to participate in interscholastic sports programs.

In addition to planned physical education, the school shall provide age-appropriate physical activities (e.g., recess during the school day, intramurals and clubs before and after school, and interscholastic sports) that meet the needs of all students, including males, females, students with disabilities, and students with special healthcare needs.

All after-school programs shall provide developmentally appropriate physical activity for the students who participate.

C. With regard to other school-based activities the District shall:

The schools shall provide at least 20 minutes daily for students to eat.

The schools shall provide opportunities for staff, parents, and other community members to model healthy eating habits by dining with students in the school dining areas.

Schools in our system utilize electronic identification and payment systems, therefore, eliminating any stigma or identification of students eligible to receive free and/or reduced meals.

Students are discouraged from sharing their foods or beverages with one another during meal times, given concerns about allergies and other restrictions on some students' diets.

D. With regard to nutrition promotion, the District shall:

encourage students to increase their consumption of healthful foods during the school day;

create an environment that reinforces the development of healthy eating habits, including offering the following healthy foods that comply with the USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards:

a variety of fresh produce to include those prepared without added fats, sugars, refined sugars, and sodium

a variety of vegetables daily to include specific subgroups as defined by dark green, red/orange, legumes, and starchy

whole grain products 51% of all grains need to be whole grain-rich upon initial implementation and all grains must be whole grain-rich within two (2) years of implementation

fluid milk that is fat-free (unflavored and flavored) and low-fat (unflavored)

meals designed to meet specific calorie ranges for age/grade groups

eliminate trans-fat from school meals

require students to select a fruit or vegetable as part of a complete reimbursable meal

provide opportunities for students to develop the knowledge and skills for consuming healthful foods

The District nutrition department will promote and encourage Farm to School efforts in order to provide the healthy foods identified above.

Promotions/Partnerships:

Through partnership with Girls on the Run.

Furthermore, with the objectives of enhancing student health and well being, and reducing childhood obesity, the following guidelines are established:

- A. In accordance with Policy 8500, entitled Food Service, the food service program shall comply with Federal and State regulations pertaining to the selection, preparation, consumption, and disposal of food and beverages, including but not limited to the USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards, as well as to the fiscal management of the program.
- B. As set forth in Policy 8531, entitled Free and Reduced Price Meals, the guidelines for reimbursable school meals are not less restrictive than the guidelines issued by the U.S. Department of Agriculture (USDA).
The sale of foods of minimal nutritional value in the food service area during the lunch period is prohibited.

- C. The sale of foods and beverages to students that do not meet the USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards to be consumed on the school campus during the school day is prohibited.

The food service program will strive to be financially self-supporting; however, if it is necessary to subsidize the operation, it will not be through the sale of foods with minimal nutritious value.

The food service program will provide all students affordable access to the varied and nutritious foods they need to be healthy and to learn well.

All foods available to students in District programs, other than the food service program, shall be served with consideration for promoting student health and well-being.

The food service program shall be administered by a qualified nutrition professional.

The food service program shall be administered by a director who is properly qualified, certificated, licensed, or credentialed, according to current professional standards.

All food service personnel shall receive pre-service training in food service operations.

Continuing professional development shall be provided for all staff of the food service program.

The Board designates the Superintendent as the individual(s) charged with operational responsibility for verifying that the District meets the goals established in this policy.

The Superintendent is also responsible for informing the public, including parents, students and community members, on the content and implementation of this policy. In order to inform the public, the Superintendent shall:

distribute information at the beginning of the school year to families of school children; and post the policy on the District's website.
